TomTom WEBFLEET.connect

- All of TomTom WORK's intelligent solution, wrapped up in a simple interface, ready for you to use.
- Providing real-time positioning, messaging, vehicle and order status data.

Connected Navigation from TomTom WORK brings immediate cost savings to the business, improves customer service levels and provides reliable information for efficient planning. But that's not all. With the help of our WebService, TomTom WEBFLEET.connect, Connected Navigation can become a truly integrated part of your business. So that it runs more smoothly, more reliably and faster than ever.

Why TomTom WEBFLEET.connect?

Integrate

Is there already a mature and stable business systems that you rely on? The last thing you want now is throw that all away and start over with something new. But whether it's CRM or ERP, your planning system or your billing system, WEBFLEET.connect enables your business to carry on enjoying all the benefits of your current systems, enhanced by all the benefits of Connected Navigation.

Customise

Because there's no such thing as a standard business, TomTom WEBFLEET.connect gives you access to all your current rich fleet and order data, while allowing to build on that data and customise it to your specific business needs.

So you don't just have connected navigation as a new feature added to your existing applications. You have the connected navigation solution you need for your business.

Innovate

Create a bespoke application to serve a specific industry or market, fed by the rich business intelligence data delivered by TomTom WEBFLEET.connect
